DETAILED ACTION

Receipt is acknowledged of the amendment, filed on 11/13/2003, which has been entered in the file. Claims 3-6 and 8-10 are pending.

Allowable Subject Matter

- 1. Claims 3-6 and 8-10 have been allowed over the prior art of record.
- 2. The following is an Examiner's statement of reasons for allowance: The prior art of record, taken alone or in combination, fails to teach or fairly suggest: a system and method for decoding data codes including reading means for reading the decode data corresponding to one of the data codes showing the error from the memory through the input and output means when the error is detected; obtaining means for obtaining the decode data in the memory when the error rate from the first calculating means is higher than a reference and the error is detected by the detection means; in combination with the other claimed limitations as set forth in the claims.

While the combination of Markman, He et al and Garber et al teach storing errorcorrected data in the memory of a data code label, there is no suggestion to read the
data from the memory when an error is detected or when an error rate is greater than a
reference level. Following He et al's teachings, one of ordinary skill in the art at the time
of the invention would simply correct the errors each time the errors occurred when
reading the optical data image. Thus, without the benefit of applicant's teachings, there
is no motivation for one of ordinary skill in the art at the time of the invention to combine
the prior art in a manner so as to create the claimed invention.
